

# *CCTV*-pedia: How many CCTV cameras do you need?

CCTV-pedia > CCTV Cameras > How many CCTV cameras do you need?

Before you can answer the question above, you need to determine what are the objects and areas that you want to monitor. It would be easier to go to the site and survey the place. Usually it is not economical to cover every angle of a large premise with CCTV cameras. Having too many cameras at your premise could also make your guests or visitors feel uncomfortable. On the other hand, if there are important angles that should not be left out of view, then cameras will have to be installed to cover those angles. It would be a mistake to put cost as the major consideration over the objectives of having CCTV cameras installed.

Since there are many types of CCTV cameras that performs differently, it will be a good idea to see a demo of the equipment yourself. A professional sales specialist could explain and help you understand the performance and limitations of each type of cameras.
